

WHAT IS THE SAIC?

The Strategic Analysis and Information Center (SAIC) integrates Ohio Homeland Security's Infrastructure Protection Unit, Center for P-20 Safety & Security, Scrap Metal Program, the Ohio State Highway Patrol's Computer Crimes Unit and Ohio's Cybersecurity Center.

The SAIC's mission is to secure and protect the state's vital resources and assets, offer safety and security resources to Ohio schools, and provide cybersecurity products, services and forensic analysis.

ANALYSIS &
INFORMATION
CENTER**

WHY DOES THE SAIC MATTER TO YOU?

The SAIC works to create a safer Ohio by sharing information, conducting security and threat assessments, and identifying vulnerabilities to critical infrastructure in your area and throughout the state.

You can utilize the expertise of the SAIC to assist in investigations involving computers, cybercrimes and theft of scrap metal, as well as for research and analysis related to critical infrastructure, school safety and security.

WHAT DOES THE SAIC PROVIDE?

- Forensic examination of electronic devices
- Access to the Communication and Information Management System (CIMS)
- Access to the scrap metal database
- Disseminates information on cybersecurity threats
- Early warning on cybersecurity threats
- Safety and security planning for schools
- Research on special events within the state
- SkyWatch™ Towers for large events
