

PICKUP TRUCK SAFETY

BEGINS WITH YOU!

Pickup truck drivers and their passengers are among those Americans least likely to regularly wear their seat belts according to the National Highway Traffic Safety Administration (NHTSA).

With nearly 1.65 million pickup trucks registered in Ohio, these vehicles remain popular with all ages. As the popularity increases, so does the frequency of crashes.

In 2018, Ohio reported 59,629 pickup trucks involved in crashes. Of those, 249 were involved in fatal crashes and 13,953 in injury crashes.

The National Highway Safety Administration reported that occupants in a pickup truck are three times more likely to be involved in a rollover crash than in any other type of vehicle. Rollover crashes are responsible for the largest number of motor vehicle fatalities and injuries in the United State each year.

Remember to always wear your seat belt, because that is the single best defense against ejection in a crash. In fact, the simple step of always buckling up will increase your odds of survival by 70 to 80 percent if involved in a rollover crash.

Drivers and passengers should practice safety when riding in these vehicles.

Space limitations often lead passengers to ride in the cargo area.

Ohio's Open Cargo Law restricts the transporting of passengers in the open cargo area of most vehicles.

The law prohibits people under the age of 16 from riding in an unenclosed area of a vehicle traveling faster than 25 mph.

So the next time you drive or ride in a pickup truck, be sure to "pick up" some safety habits along the way.

The life you save may be your own!
